

THE CIRCULATORY SYSTEM

OBJECTIVE

Seeking employment in the field of transportation.

JOB HISTORY

Train Operator for Trains of America • 2018 - present

I make sure passengers get from point A to point B and monitor high-speed train movement. I never stop operating even though from about 9:00 P.M. to 7:00 A.M. I work slower.

Circulatory System at Stan the Man Human Body • 1980 - 2018

I transported oxygen-rich blood to the rest of the body. I also carried white blood cells around to places in the body that needed to fight diseases. When Stan got a cut, I clotted his skin with platelets. And I kept the body running.

TESTIMONIALS

Cisco the Circulatory System was a great clotter. He provided immediate attention when I was cut or bruised, often when Stan was outside. Without him, Stan would be in BIG trouble. I am honored to say that Cisco is reliable.

- Sally the Skin

Cisco Circulatory System was a great partner to work with. He would come every so often to trade oxygen and carbon dioxide with me. A great transporter, partner, and friend, Cisco was a big help to all of us systems.

- Rosie the Respiratory System

Cisco was a great worker. He never stopped. I would give him the new blood cells I made, and off he went! He would run back and forth to me, ready for the next load. Even late at night he would still be running. He was a great partner!

- Marty the Marrow
